

Section Six

Loops

Complete the Following Tasks

Task 1

Identify the problem associated with efficiency below

```
a = ['a', 'b', 'c', 'd', 'e', 'f', 'g']
for b in a:
    for c in a:
        for d in a:
            print(d)
```

Task 2

What is one major difference between the while and for loops?

Task 3

Create a loop that has a conditional break and continue statement
