

Section Five

Strings of Text

Complete the Following Tasks

Task 1 Answer

```
a = 'test'
print(f"{'a'}")
```

Task 2 Answer

The * allows you to duplicate strings of text. Data types are important for these operations because * must behave differently for text and numbers

Task 3 Answer

```
a = "abcdefghijklmnpqrs"
print(a.index("'"))
```

Task 4 Answer

```
a = 'The cow jumped over the dog. Then the cat meowed'
print(a[a.index(".")-3:a.index(".")])
```
