

Section Five

Strings of Text

Complete the Following Tasks

Task 1

Create a string of text that includes single and double quotes. Also include a variable in the string of text. Print out the text

Task 2

We know that the '+' concatenates text together. What does the '*' do? Why are data types important for these operations

Task 3

Use a String method to print out the position of the " ' " in the following string: 'abcdefghijklmnkopqrs'

Task 4

Get the substring 'dog' from the following string using the index method. 'The cow jumped over the dog. Then the cat meowed'
