Task 1 Answer

Use comments to clarify ambiguous code segments. Use line continuation to shorten longer lines

- Starts a comment

\ - Line continuation

Task 2 Answer

```python
a = 'pizza'
if a == 'test':
    print('true')
```

Task 3 Answer

```python
a = 'pizza'
if a == 'test':
    print('true')
elif a == 'test two':
    print('true')
```

Task 4 Answer

```python
if a in ['test', 'test two']:
    print('true')
```
