Functions

Complete the Following Tasks

Task 1 Answer

Functions are smaller bits of reusable code that help support the DRY principle. Sometimes, they are described as smaller programs within your larger program as they commonly do something very specific.

Task 2 Answer

```python
def word_list(words: list, char: str):
    for word in words:
        if word[0:1] == char:
            continue
        words.remove(word)
        word_list(words, char)
        break
```

Task 3 Answer

```python
def custom_range(a: int, b: int):
    for i in range(a, b + 1):
        if i % 2 == 1:
            yield i
```
